PROFILE

Full-Stack Developer with 2 years of experience building scalable web and mobile apps using MERN stack and Flutter. Known for self-driven development, rapid learning, and building complete production-ready systems from scratch.

EDUCATION

Brainware University
Bachelor of Computer Application (9.4 CGPA)

Kolkata, India
2021 - 2024

SKILLS

- **Frontend:** React, Next.js, Flutter, Redux, HTML, CSS, Tailwind, Bootstrap, JavaScript, TypeScript
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, MySQL, Firebase
- **Tools & Platforms:** Git, GitHub, Vercel, Render, Apache2, PM2
- **Other:** C, Java, Python, UI/UX Design Understanding, Deployment.

CERTIFICATION & AWARDS

- Full Stack Developer - Jun 2023 (Udemy)
- Problem Solving - Jan 2023 (HackerRank)
- Intel oneAPI Hackathon - Mar 2023 (Internal)
- CodeGolf(2nd runner-up) - Jun 2022 (Internal)

EXPERIENCE

Web Idea Solution LLP

Kolkata, India
2023 - Present

Full Stack Developer

- Developed and deployed several full-stack applications using the MERN stack and Flutter for Android.
- Integrated RESTful APIs and Firebase for backend functions, authentication, and real-time data handling.
- Led UI development with Tailwind CSS and Bootstrap to create responsive and accessible designs.
- Utilized Redux for efficient state management and enhanced performance with memoization and lazy loading techniques.
- Deployed production-ready apps on IONOS and AWS, managing processes with PM2, Apache and NGINX.

PROJECTS

Restro - A Restaurant Management System

- Built a full-stack restaurant delivery and management system using the MERN stack, featuring real-time delivery tracking, multi-order routing, and role-based dashboards.
- Integrated modules like employee management, shift & absence scheduling, inventory tracking, order lifecycle management, and delivery boy location syncing using WebSockets and TomTom Maps.
- Personally handled end-to-end architecture — UI/UX, backend logic, REST APIs, MongoDB schema design, and production deployment via Apache2, and PM2.

OnHousing - A Mutli-Service Booking System

- Built the entire UI/UX of the OnHousing mobile app in Flutter, managing complex state flows using GetX for smooth performance and modular control.
- Developed core business logic and integrated in-app chat between users and service providers, along with secure online payment handling.
- The app offers services like land, hotel, cab, shopping, and bus booking, designed as an all-in-one housing and lifestyle platform.

BookingRoute - Hotel Booking System

- Designed a seamless room booking experience with custom guest selection, seasonal pricing logic (weekday/weekend), and a dynamic grid-based UI using Flutter.
- Integrated features like blog discovery, flexible rate management, and an intuitive user flow tailored for Indian hospitality use cases.
- Implemented state management using GetX and structured scalable business logic to support future extensions like offers, loyalty programs, and payment integrations.

Crosswind – Kids Learning Platform

- Built a subscription-based learning app for kids (7–12 yrs) featuring quizzes, games, and puzzles to enhance cognitive skills.
- Designed a Candy Crush–style progression system for levels and stages to boost engagement and retention.
- Integrated a payment gateway, user progression tracking, and scalable architecture for seamless performance.

Eisaku – Logistics Management Web App

- Developed a scalable logistics platform to manage large-scale courier operations, including shipment tracking, order lifecycle, and operational workflows.
- Implemented robust RBAC (Role-Based Access Control) for multi-level permissions across modules.
- Designed modular architecture to handle high-volume logistics processes efficiently.

Rivago Infotech – Recruitment & Staffing Platform

- Developed and contributed to a web platform for a global staffing and recruitment company, enabling seamless talent acquisition, job management, and client engagement.
- Built scalable modules to handle candidate sourcing, job listings, and recruitment workflows across multiple industries.
- Focused on performance, clean UI, and efficient data handling.
